### DETAILED ACTION

**The rejection made under 35 U.S.C.112, first paragraph, is hereby withdrawn in view of amendment to claim 1.**

Applicant's arguments filed 8/11/05 have been fully considered but they are not persuasive. The Amendment submitted by Applicant does not overcome the rejection made by examiner in the last office action.

Claims 1, 4-7, 11-17 and 19-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cotter reference (4,819,419).

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cotter in view of Fukuyama.

The rejection is maintained for the reasons as stated in the last office action and for the following reasons:

Applicant's arguments are based on the claimed composition in that the reference does not disclose the claimed polyethersulfone composition comprising structural units derived from a monomer mixture comprising bisphenol A and 4,4'-biphenol present in a range of from about 70 mole% to about 80 mole% based on total moles of diphenolic monomers, wherein the polyethersulfone has a min. Mw of 54,000.

Note that the Cotter reference does disclose the polyarylether sulfones by reacting a dihydric phenol with 4,4'-dichlorodiphenyl sulfone (see Abstract and at col. 3, lines 19-26) in that the dihydric phenol is a mixture of 4,4'-biphenol and bisphenol A, containing from about 50-90 mole% of 4,4'-biphenol (see col. 3, lines 55-57), overlapped with those in claim 1.

Further the reference does disclose in Table 2, the molar ratios of biphenol and bisphenol A can be varied as desired. Therefore, it would have been obvious to one of ordinary skill in the art to modify the molar ratios of biphenol/bisphenol A from the reference within the limitation of the instant claims since they have been shown to be effective in a similar system and thus would have been expected to provide adequate results, such as the claimed minimum weight average molecular weight. There is no showing of unexpected results derived from said selection.

Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5 is indefinite in that the repeating units t, s and u is not defined.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 1711

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
